Interactive Visual Ideas

Interactive Item(s)

For my interactive ideas,

- I am planning to create an illustrated image where the user clicks multiple times in different areas and the illustrated image appears many times where the user has clicked. (mouse clicks)
- I plan to illustrate an old western cowgirl hat and a pair of cowgirl boots.
- The background will be simple, maybe one color or add some shapes to make it look like a landscape.
- I plan to use a specific color palette (3 or 4 colors), but haven't decided just yet.
- Although there will be clicking involved, I plan to also let users have the ability to press any key for it to also work. (keyboard press)
- I don't plan on including audio, just illustrated images that the user will mouse click/keyboard presses.
